

EUAs rose after breaking through a technical-resistance level, while German power contracts gained. EU permits for December increased by 7 cents, or 0.5 percent, to 14.60 euros per ton.

German electricity for delivery next year fell as coal prices slid from near their highest level in two years, potentially making electricity generation cheaper. Baseload power for 2011 dropped on Wednesday as much as 55 cents, or 1.1 percent, to 51.90 euros a megawatt-hour, its lowest price since Dec. 21.

The regulator of the United Nations emissions market should do more to speed up approvals for projects to cut greenhouse gas, the Carbon Markets and Investors Association said on Friday. The executive board of the UN's Clean Development Mechanism said yesterday it reduced the backlog of pending requests for project registration and new credits to 30 days from about 90 days. While that's an improvement, it is still double the target set at last year's climate summit in Cancun.

China will "basically meet" its target of reducing energy consumption per unit of gross domestic product by about 20 percent by the end of 2010 from 2005 levels, Xinhua News Agency said, citing National Development and Reform Commission Director Zhang Ping.
